

PLASTISTAB® 2192

Description:

PlastiStab® 2192 is a lubricating powdered calcium/zinc PVC heat stabilizer designed for cable jacket applications rated up to 90 °C. PlastiStab® 2192 is a cost effective alternative to tribasic lead sulfate. PlastiStab® 2192 will provide excellent color hold and process stability as well as excellent retention of physical properties after heat ageing.

- PlastiStab® 2192 does not contain cadmium, barium, lead, mercury, or hexavalent chromium.
- PlastiStab® 2192 will provide exceptional process stability.
- PlastiStab® 2192 is recommended at a use level of 3-7 parts per hundred parts of resin.

Physical Properties:	Methods	Typical
Form	Visual	Powder
Color	Visual	Off-White
Apparent Density	AMS-10-QL29	0.3 g/cm ³
% retained on 200 mesh screen	AMS-10-QL29	5 % Max.

Shelf Life: 3 year from the date of manufacture in the original unopened package
